👤 PROFILE

- I am a recent graduate with a degree in Mechanical Engineering, but my true passion lies in the world of software development. Throughout my academic journey, I discovered a deep interest in coding and software design, leading me to pursue self-study and personal projects in the software field. My dedication and enthusiasm have propelled me to seek my first job opportunity in software development, where I am eager to apply my problem-solving skills and technical knowledge to contribute to innovative projects and continue my growth in this dynamic industry.

🧠 SKILLS

Frontend:

HTML, CSS, JavaScript, ReactJs.

Backend:

NodeJs, Express, MongoDB

Others:

Git, GitHub, Postman, VS Code

📁 PROJECTS

2023/05

MERN Stack To-Do Application

- I developed a modern To-Do application using the MERN stack. This full-stack application showcases the capability to create responsive web applications, encompassing tasks such as database design, API development, seamless front-end and back-end integration.

2023/07

Weather Forecast Application

- I developed a Weather App using React.js. In this React application, Implemented real-time weather data retrieval and display, allowing users to check current weather conditions for specified locations. This project showcased proficiency in React components, API integration, and responsive web design, highlighting a strong foundation in front-end development and problem-solving skills.

2023/09

Portfolio Website

- The website boasts a contemporary design that is not only visually appealing but also user-friendly. Its responsive layout ensures that it looks and functions flawlessly across various devices and screen sizes.

🎓 EDUCATION

2019 – 2023
